

myenergi SMART ENERGY PARTNER

POWERING THE SMART ENERGY REVOLUTION

Smart Energy. Smarter Homes.

myenergi builds the UK's most loved home energy management ecosystem – connecting EV chargers, solar diverters, home batteries and energy monitors into one seamless platform.

- ✓ Smart EV charging – **zappi**
- ✓ Solar & wind energy diversion – **eddi**
- ✓ Home battery storage – **libbi**
- ✓ Wireless energy monitoring – **harvi**

Clean energy managed daily

THE PROBLEM

The Energy Crisis at Home

Rising bills, wasted renewable energy and disconnected technology mean most households are paying far more than they should – and contributing more to the grid than necessary.

+127%

avg. UK energy bill increase since 2021

RISING COSTS

Energy bills have doubled in three years

UK households now spend an average of £2,500 per year on energy – up from £1,100 in 2021. Consumers are desperate for smarter ways to manage and reduce consumption.

1.3M

UK homes with solar – mostly unoptimised

WASTED RENEWABLES

Millions of kWh of solar energy dumped to grid daily

Over 1.3 million UK homes have solar panels, yet most export surplus energy for just 15p/kWh – when they could be using it to charge their EV or heat water for free.

0

FRAGMENTED SYSTEMS

Home energy devices don't talk to each other

EV chargers, solar panels, batteries and smart meters are all siloed. There's no unified intelligence optimising the what, how and when of energy use in the home.

SCROLL ↓

THE PROBLEM – CONTINUED

The EV Revolution Needs **Smarter Charging**

Electric vehicles are transforming transport – but the charging infrastructure hasn't kept pace. The gap between EV adoption and intelligent energy management is where myenergi operates.

CHARGING COSTS

Charging at home at the wrong time costs 4× more

Peak-rate home charging can cost up to 60p/kWh. Smart solar-integrated charging brings that to near zero for EV drivers with renewable generation.

GRID STRAIN

Unmanaged EV charging risks destabilising the grid

By 2030, 11M EVs on UK roads need to charge. Without smart load management, simultaneous evening charging creates dangerous demand peaks.

INSTALLER COMPLEXITY

Customers want one solution, not five separate systems

Installers are losing deals to confusion. Customers ask about EV chargers, then solar, then batteries – without a unified platform, every answer requires a different vendor.

myenergi's answer: One ecosystem. One app. One platform that connects EV charging, solar diversion, and battery storage – intelligently managed in real time.

THE MARKET

A £200 Billion Global Opportunity

The home energy management market is one of the fastest-growing sectors in cleantech. Policy tailwinds, consumer demand and rising energy costs are converging to drive explosive adoption.

EV Adoption is Accelerating

THE MARKET

EV Adoption is Accelerating

The UK is on course for 11 million EVs by 2030. Every one of those vehicles needs a smart home charger – and every smart charger is an opportunity for myenergi.

THE MARKET

The Installer Advantage

Partnering with myenergi isn't just about selling hardware – it's about building a sustainable, recurring business around the most trusted brand in home energy management.

REVENUE STREAM 1

Product sales & margin

Industry-leading installer margins on zappi, eddi, libbi and harvi. Competitive pricing structures, volume discounts and dedicated account management for registered partners.

25-35% typical installer margin

REVENUE STREAM 2

Recurring service & support

Annual maintenance packages, remote monitoring and priority support plans generate predictable recurring income beyond the initial installation.

£180-£350 per system per year

REVENUE STREAM 3

Ecosystem upsell opportunities

Every zappi installation opens the door to eddi, libbi and harvi. Customers with one myenergi product convert to multi-product at 3× the rate of non-myenergi customers.

3× upsell conversion rate

THE PLATFORM

The myenergi Ecosystem

Every myenergi device connects to a single intelligent hub – sharing energy data in real time so your home always makes the smartest decision about how to generate, store and use energy.

- ✓ Real-time energy routing between all devices
- ✓ Solar surplus automatically directed to EV or battery
- ✓ Grid tariff awareness – charge when energy is cheapest
- ✓ Remote monitoring & control from anywhere
- ✓ Compatible with Alexa, Google Home & IFTTT
- ✓ Regular OTA firmware updates with new features

 zappi

Manage & monitor your energy from anywhere

THE PLATFORM

Meet the Products

Three complementary devices. One unified ecosystem. Each product is powerful alone – together they form the most complete home energy management system available.

BEST SELLER

zappi
SMART EV CHARGER

The UK's #1 smart EV charger. zappi automatically uses surplus solar or wind energy to charge your vehicle – so you can drive on sunshine for free.

From £799 inc. VAT

Open →

eddi
SOLAR DIVERTER

Stop wasting solar energy. eddi diverts surplus renewable electricity to your hot water cylinder or space heating – turning excess generation into free hot water.

From £299 inc. VAT

Open →

NEW

libbi
HOME BATTERY

Store solar energy for when you need it most. libbi home battery integrates with the whole myenergi ecosystem – charge from solar, discharge to power your home or EV.

From £3,999 inc. VAT

#1 UK Smart EV Charger From £799

THE PLATFORM

zappi – Smart EV Charger

- Overview
- Specifications
- Eco Modes
- Installation

zappi is the world's first EV charger designed from the ground up to work with renewable energy sources. Rather than just drawing from the grid, zappi monitors your solar or wind generation in real time and prioritises using that free energy to charge your vehicle.

The result: EV owners with solar panels can charge their car for free during daylight hours – and zappi ensures every last watt of surplus generation is put to work instead of exported for a fraction of its value.

zappi connects to the myenergi hub (or directly via Wi-Fi) and integrates with eddi and libbi to create an intelligent whole-home energy management system.

FEATURE CHECKLIST

Click to toggle compatibility status

- ✓ Fast charge (full grid power)
- ✓ Eco mode (solar surplus priority)
- ✓ Eco+ mode (100% renewable only)
- ✓ Scheduled overnight charging
- ✓ Boost to minimum charge level
- ✓ CT clamp integration (harvi)

Ready to quote?

Access trade pricing and configure a full zappi system for your next installation.

THE PLATFORM

Complete Home Connectivity

harvi and the myenergi hub complete the ecosystem – providing wireless energy monitoring and seamless cloud connectivity that ties every device together.

harvi
WIRELESS CT CLAMP

No cabling required. harvi clips onto your existing electricity supply cables and wirelessly transmits generation and consumption data to the myenergi hub – unlocking smart charging without rewiring.

- ✓ Wireless 868MHz transmission
- ✓ Up to 3 CT inputs
- ✓ 300m+ range (line of sight)
- ✓ Battery or supply powered

myenergi hub
CONNECTIVITY HUB

The intelligent centre of your myenergi system. The hub coordinates all devices, connects them to the internet, enables remote access via the app, and runs local automation even without connectivity.

- ✓ Ethernet + Wi-Fi connectivity
- ✓ Controls all myenergi devices
- ✓ Local operation without internet
- ✓ OTA firmware updates

And growing

COMPANY TIMELINE

- 2016 ● myenergi founded in Lincolnshire
- 2017 ● zappi launched – first smart EV charger with solar integration
- 2019 ● eddi solar diverter launched
- 2020 ● 100,000 devices installed across the UK
- 2021 ● European expansion – 12 new markets
- 2022 ● libbi home battery launched ·300,000 devices milestone
- 2023 ● 500,000 devices ·£100M+ revenue milestone
- 2024 ● harvi 2.0 ·myenergi hub Gen 3 ·40+ country distribution
- 2025+ ● Vehicle-to-home (V2H) technology ·AI-powered energy optimisation UPCOMING

WHERE THIS TAKES YOU

A Network Built on Trust

3,500+ approved installers choose myenergi because we treat our partners as the foundation of the business – not an afterthought.

PARTNER PROGRAMME BENEFITS

-  **Free technical training**
Accredited myenergi installer certification, online and in-person
-  **Trade pricing & stock**
Competitive wholesale pricing, next-day delivery from UK warehouses
-  **Dedicated support line**
Priority technical helpline with real engineers, not scripts
-  **Marketing materials**
Branded collateral, product samples and co-marketing opportunities
-  **Installer portal**
Online quoting, job management and firmware update tools
-  **Partner recognition**
Tiered programme: Registered, Approved, Premier & Elite levels

WHAT OUR PARTNERS SAY

★★★★★

"myenergi products practically sell themselves once customers understand what they can do. We've doubled our EV charger installs since becoming an approved installer."

James H.
Solar & EV Installer, Yorkshire

★★★★★

"The technical support from myenergi is second to none. When I have a question, I get an answer from a real engineer – not a chatbot."

Sarah M.
Electrical Contractor, Scotland
